

ProxerNet software

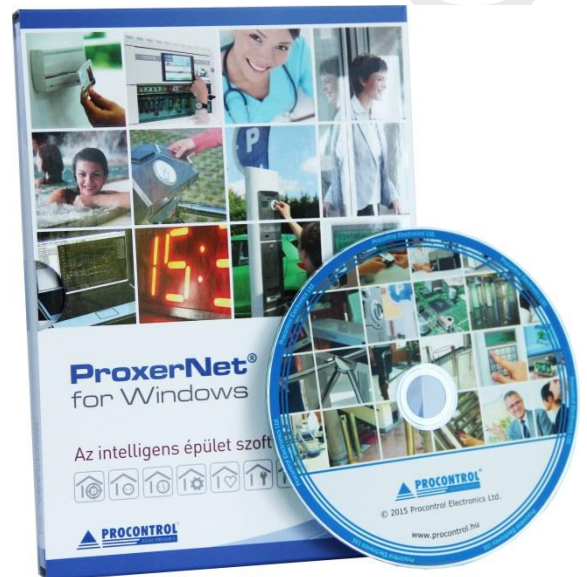

Building management system access control features

The ProxerNet system is an advanced modular building management system containing the following modules (available combined or separately):

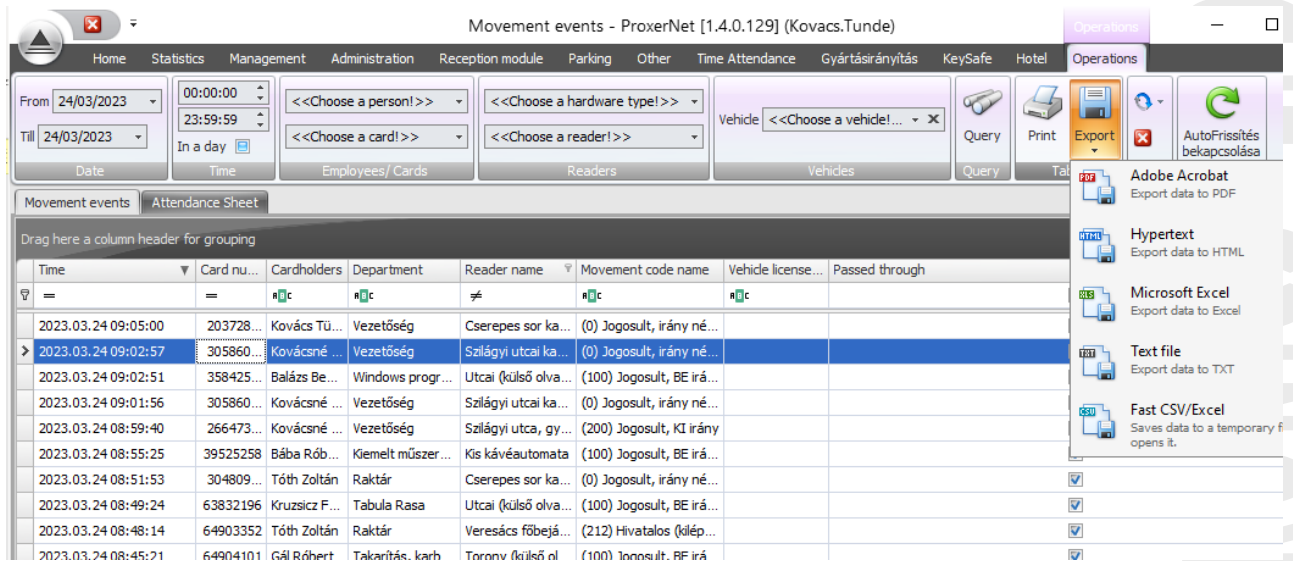

- Access control with visitor management, authority management
- Parking lot management and billing
- Cabinet lock management
- Queue management
- Time / attendance
- Real time location system (RTLS) – personal tracking
- Conference control
- Production Management
- Key management

General properties of the ProxerNet system:

- Continuous on-line operation “24 / 7” without on-site administrator
- Client / server operation over TCP/IP networking
- Server and Client system components run on Microsoft Windows operating system
- Server component is running as a Windows service
- Database storage in Microsoft SQL Server Database
- Expandable multi-language client interface, including Arabic
- Easy to use client software with flexible data filtering, sorting and reporting
- Web client access option for certain features
- Life-tested system with large multiple-site client installations at multinational company clients
- Flexible alarm system with monitoring system (with e-mail and/or SMS alarms)
- Unlimited number of software users with flexible software functionality / individual scope limitation
- Audit trail of all changes (eg. individuals, cards, rights, settings, data) are logged
- Support for all of Procontrol-brand access control hardware, expandable with other brands and models on customer request
- Software is available in English language

Windows client interface:
